

Safety Performance

(Construction)

1. Applicability

The requirements and provisions of this form shall apply only to the extent Builder or subcontractors of Builder, at any tier, performs the work required by this contract at locations or plants specifically identified by United Space Alliance, LLC (USA) in the contract. As used throughout the remainder of this form, unless specifically indicated otherwise, the term "Builder" shall include Builder's subcontractors at any tier.

2. Requirements

- a. In addition to applicable federal, state and local laws and regulations, Builder shall comply with requirements unique to the job or location as determined by USA. Conflicts between or among the requirements of any applicable federal, state or local law or regulation or any other provision of the contract, shall be brought to the attention of USA, only in writing and only by the Builder.
- b. USA's Environmental, Safety and Health Organization will, from time to time, observe Builder's performance of work under this contract to verify compliance with:
 - Applicable federal, state or local laws and regulations for work related safety and health concerns
 - Builder's Safety Plan
 - Job-specific safety requirements, and
 - Builder has established and promoted effective safety and health programs
- c. USA's Environmental, Safety and Health Organization shall have the authority to:
 - Stop any unsafe tasks performed by Builder under this contract.
 - Require the Builder to remove from USA's premises any employee or representative of Builder engaging in unsafe behavior.
- d. Failure of Builder to comply with the safety requirements, laws or regulations applicable to this contract shall constitute the grounds for cancellation of the contract for default.
